SUMMARY

Highly motivated and analytical problem-solver with a proven track record of quick learning and successful project management. Adept at identifying solutions, optimizing processes, and delivering results within tight deadlines. Passionate about leveraging data and insights to drive innovation and achieve strategic goals.

WORK EXPERIENCE

student - working on mini and major projects works   Jun 2023 - Present

Developed and implemented mini and major projects using Artificial Intelligence and Machine Learning techniques, showcasing proficiency in model development, data analysis, and algorithm implementation.

PROJECTS

FETAL HEALTH AI PREDICTION   Link to Demo

Developed an AI-powered fetal health prediction system utilizing advanced machine learning algorithms to analyze prenatal data. This system facilitated early identification of potential fetal health issues, empowering healthcare professionals with timely interventions to enhance prenatal care and optimize outcomes.

SOFTWARE SALARY PREDICTION   Link to Demo

Developed an AI and ML-powered system to predict software engineering salaries. Leveraged data analysis and machine learning algorithms to create a model that considers various factors, such as experience, skills, location, and company size. This system provided companies with data-driven insights for competitive salary offers and helped job seekers understand realistic salary expectations.

EDUCATION

 at DON BOSCO HIGH SCHOOL - Jul 2016 - Jul 2018 (GPA: 8.5)

VIDWAN JUNIOR COLLEGE at - Mar 2019 - Mar 2021 (Percentage: 73)

Vaagdevi Engineering College at - Jun 2021 - Jul 2025 (Percentage: 8.2)
